1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Konieczny on September 14, 2006.

Cancel claims 5 and 6.

2. The following is an examiner's statement of reasons for allowance:

The attached translation for the closest prior art of Japanese Patent No. 2002-121259 on page 5, paragraph [0017], lines 5-6 states that "[t]he equivalent weight [of diaminodiphenyl sulfone to epoxy resin] does not have to be matched," thereby corroborating the translation submitted with the remarks filed August 7, 2006 (penultimate page) describing the equivalent of diaminodiphenyl sulfone "may be off the equivalent (line 5, referring to the equivalent of the epoxy resin)." Accordingly, neither Japanese Patent No. 2002-121259 nor the other prior art recites the claimed molar ratio of epoxy resin (A) to aromatic amine curing agent (B) of from 0.7:1 to less than 0.9:1 in a formulation with particular aromatic amines within general formulae (1), (2) and/or (3) combined with an ester organic solvent of general formula (4).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."
